

Hard Reset TIMMY M20 Pro

First method:

First of all, hold down the **Power rocker** for a while in order to switch off the device.

Afterwards press and hold together **Volume Up** and **Power button** for a few seconds.

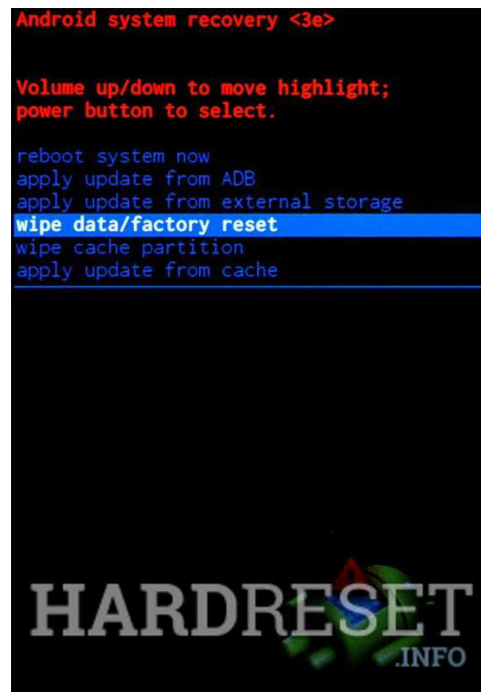

You can release held keys when you see the **TIMMY** logo in front of you.

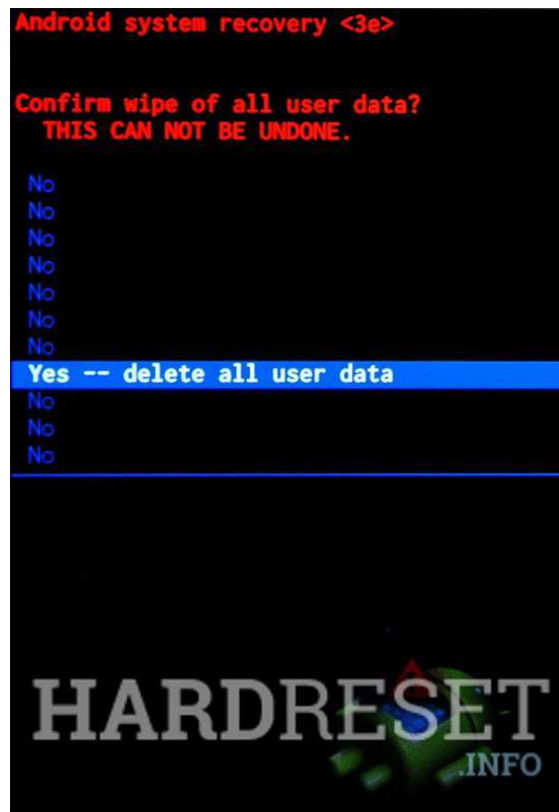

To enter the Recovery Mode hold down the **Power key** for a short while.

In the next step use **Volume buttons** to select "**wipe data/factory reset**" and tap the **Power button** to confirm

Afterwards choose "yes" from the menu, and accept it with **Power button**.

After a while accept option "reboot system now" using **Power rocker**.

Excellent! The factory reset operation should be completed.

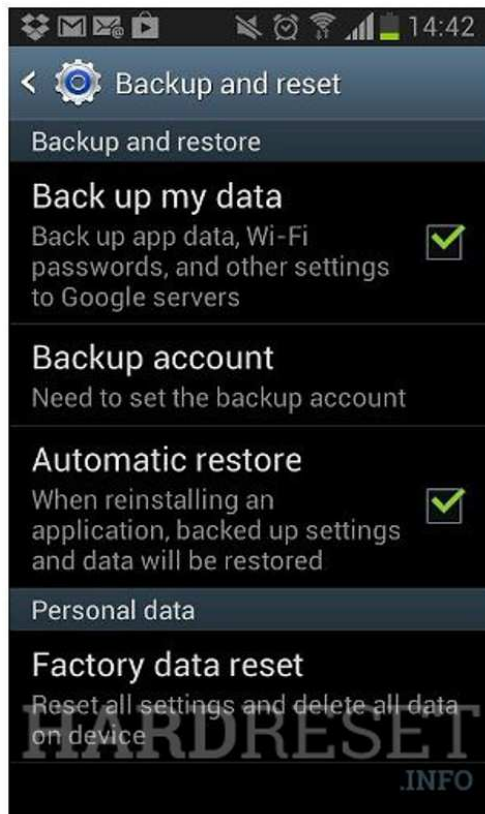

Second method:

Begin by switching on the device.

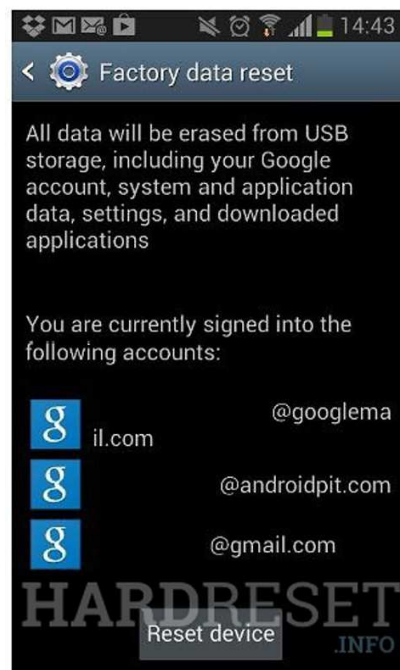

Afterwards from **Main Menu** find and select **Settings**.

Then open the **Backup and Reset** folder and select **Factory Data Reset**

Tap **Reset Phone** and read the warning when it pops up.

Choose **Erase Everything** and the phone will begin restoring.

Well done! The factory reset is done.
