3, finally you may enter MiraScreen air setup page

Internet: connect to home router

Language: change language

Password: change password

Default Mode: change default mode

Resolution: change resolution

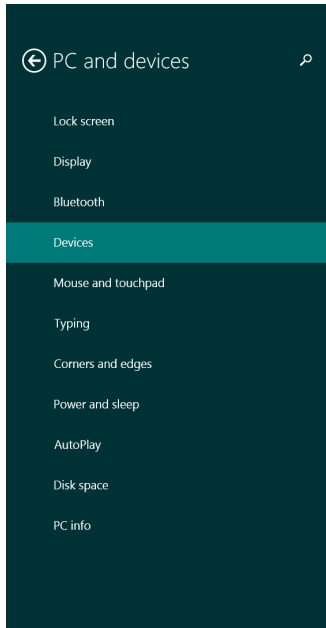

Upgrade: firmware upgrade to compatible with up-to-date devices

3.1 , For Windows Mirroring

After setup/upgrade, press the button on the MiraScreen dongle and switch to Miracast mode for Windows mirroring

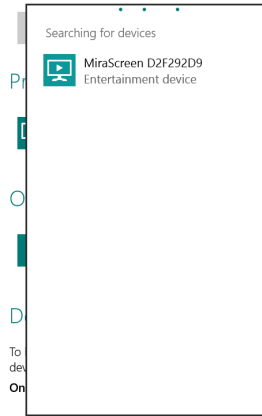

Tap PC Settings/Devices/Connected Devices/Add a device to add MiraScreen as a new device to your PC and start to Mirror

Add devices

Add devices such as TVs or printers. If your device isn't found, you might need to change your network settings.

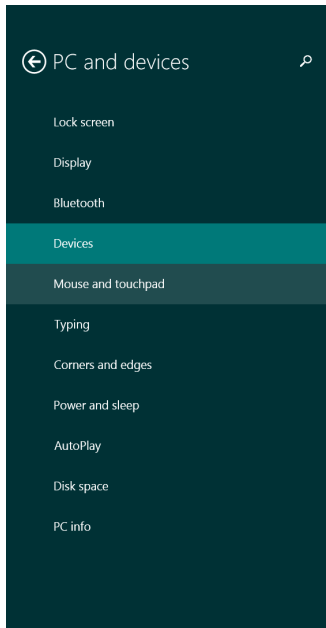

[Change network settings](#)

Connections

To help prevent extra charges, keep this off so device software (drivers, info, and apps) for new devices won't download while you're on metered Internet connections.

Default save locations

Add devices

Not connected
- MiraScreen D2F292D9

Other devices

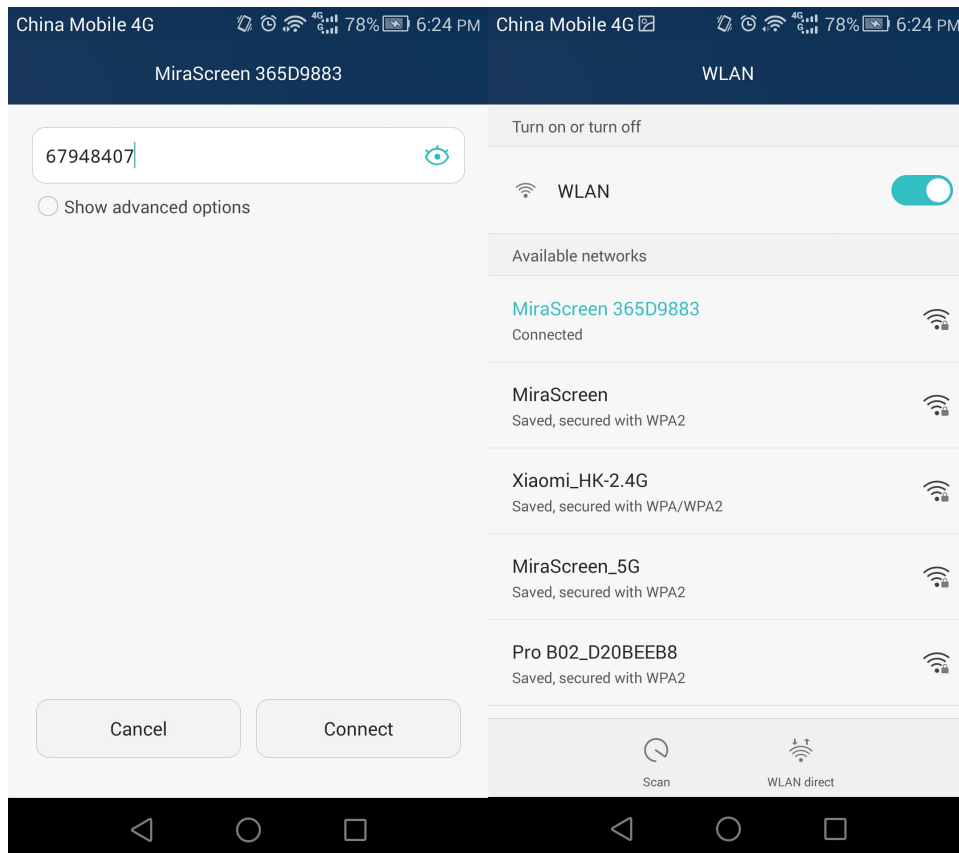

Download over metered connections

To help prevent extra charges, keep this off so device software (drivers, info, and apps) for new devices won't download while you're on metered Internet connections.

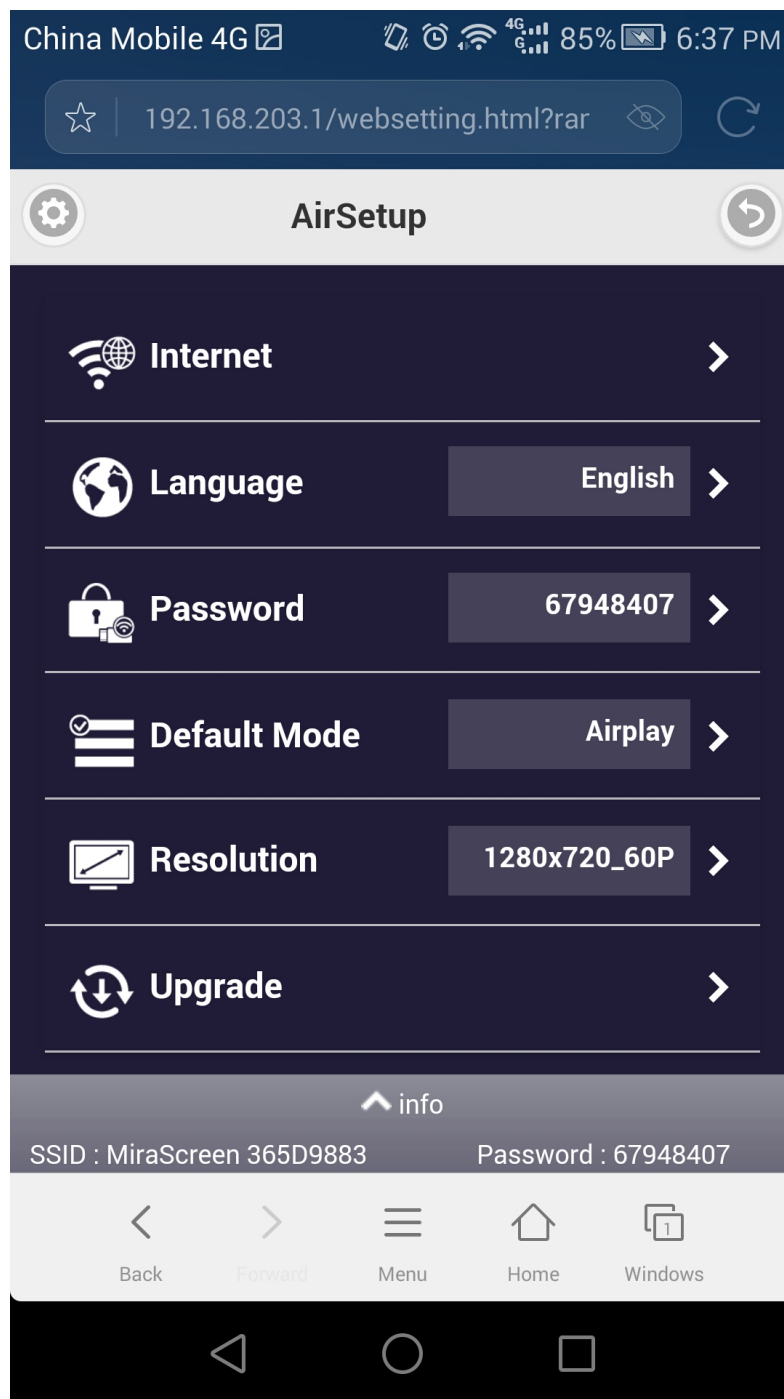

4, For Android Devices

Step 1, connect Android devices to MiraScreen network via WiFi

Step 2, launch browser and enter the IP address (192.168.203.1) to air setup

Internet: connect to home router

Language: change language

Password: change password

Default Mode: change default mode

Resolution: change resolution

Upgrade: firmware upgrade to compatible with up-to-date devices

4.1, Android Devices mirroring

After setup/upgrade, press the button on the MiraScreen dongle and switch to Miracast mode for Android devices (support Miracast) mirroring

Download WiFi Display Helper from Google Play Store to help you find out Miracast icon (such as Honor 6 Miracast: Multi-screen; Samsung S6 Android 6.0/S7 Android 6.0 Miracast: Smart View; OPPO R9 WiFi Display; LG G2 Miracast)
