How to Start Playing Golf

1. Select “Play” and press “OK” key to enter. To make sure your device shows 3D fixed and then press OK to go to Courses Selection page.

2. On the Courses Selection page, if you are unsure of the current Course’s name, you can use “AUTO” search to find this out. If you know the Course name, just use “MANUAL” to select the course in the map list.

In some countries are a left- and a right green available. Select the preferred one in the settings. Otherwise you can ignore this setting.

3. Press  key to start to play.

4. Generally, play will start with the 1st hole. You also can go to the next/ last hole number by pressing the “UP” or “Down” button.

5. **Shot Distance:** Press and hold the “Mark” button until the Shot distance page appears on the screen, then press the “Shot” button when you reach the ball.

Press and hold “Mark” for 2s

6. **Score page:** Press and hold “Up/Plus” until the score page appears on the screen. Press UP and DOWN to add needed shots. Press ESC to leave this screen.

7. **Lay Up** : In PLAY GOLF page, sometimes golfer needs to refer the best hit ball to approach GREEN, here provides lay up 100 and 150 yard points for reference.

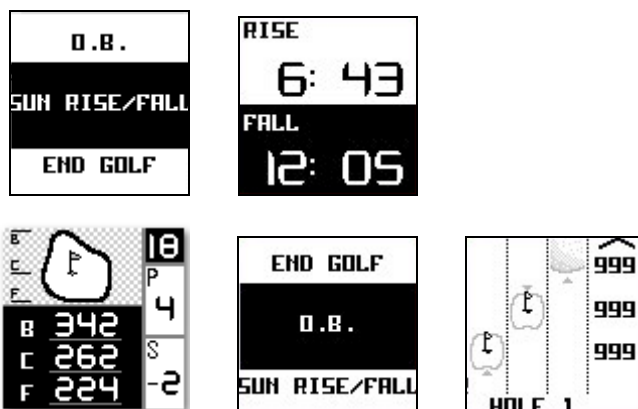

IN PLAY GOLF page, short press SHOT button, the Layup page will be shown.

8. **OB page**: Press and hold “Down/Minus” until the score page appears on the screen.

This page will show

- The object item in this hole such as a tree, water, etc.
- The daylight information
- You can end golf from here with any hole.

Note

- The device will save your score after you exit the PLAY page.
- Please ensure 3D fix before Play Golf.

How to check Score

1. Select SCORE menu and press OK.
2. The device can usually save 10 items on score cards, and will be rolling over write if records over 10 items.

Update the Course data

The enclosed CD are stored all Course data because the internal memory on the golf watch is limited.

Following areas with more than 33.000 courses are preinstalled:

EUROPE, AMERICA, NEW ZEALAND, and AUSTRALIA.

More than 4.000 courses for ASIA are provided on CD.

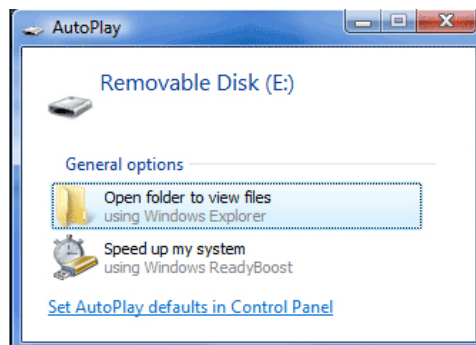

1. Please switch device's power off

2. Connect device to a PC via USB cable

3. The system will detect the device and create a new storage device.

4. Select the "Course" folder of the storage device and enter in.

- Simply copy and paste the course files into the folder “Course”.
Not all courses do fit to the internal memory. We recommend that you copy just the needed one.

ACourseDB = ASIA

ECourseDB = EUROPE

UCourseDB = America, New Zealand, Australia

- Disconnect cable and power on device.

How to Upgrade Firmware

The following procedure is only for firmware upgrade use.

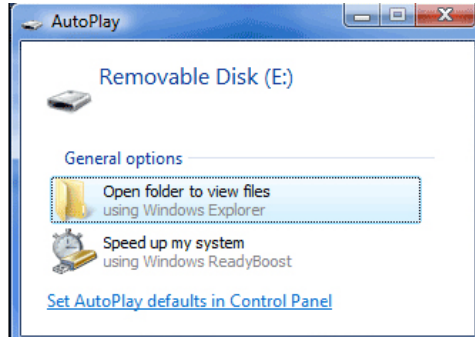

- Please switch device’s power off

8. Connect device to a PC via USB cable

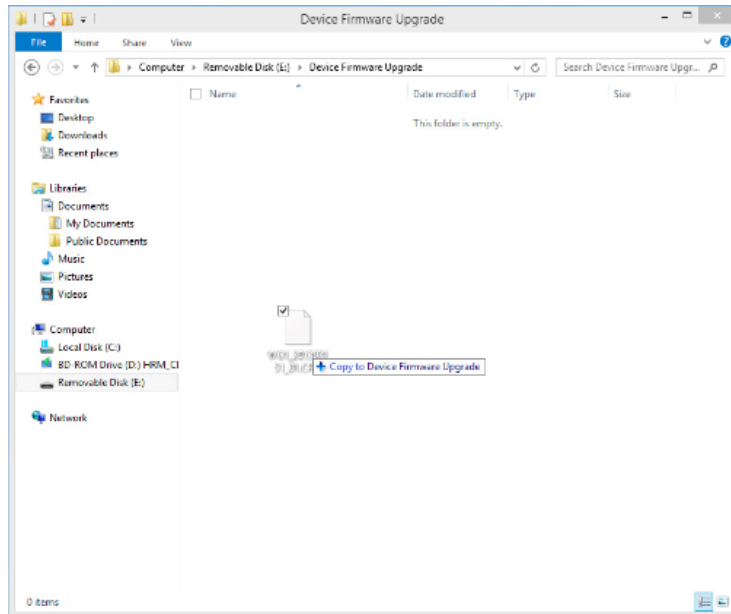

9. The system will detect the device and create a new storage device.

10. Select the "DEVICE FIRMWARE UPGRADE" folder of the storage device and enter in.

11. Simply copy and paste the firmware file into the folder “DEVICE FIRMWARE UPGRADE”.

12. Disconnect cable and power on device.

13. After few minutes, the firmware upgrade process will be complete.

Note: Please do not interrupt the firmware upgrade process.

Guarantee

Please keep the proof of purchase for this device for the entire duration of the guarantee period, as it must be produced in the event of any claim.

You (as the end user) receive a 36-month guarantee from the date of sale. The article has been manufactured using the most modern production methods and subjected to strict quality controls.

Please contact only the **manufacturer (not the dealer where you purchased it) in the event of any defects during the guarantee period.**
