GOOD THINGS,  SHARE TOGETHER

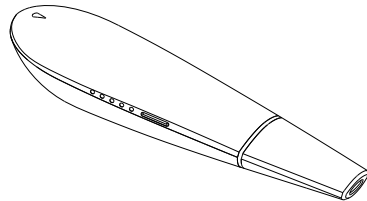

blk
USER GUIDE

DISCRIPTION

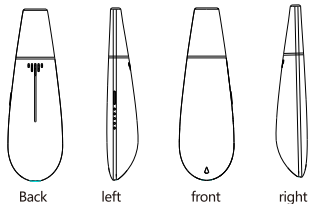

To resonate with our first generation product Black Widow Vaporizer, we give it a name of BLK. These two share so much similarities, yet different. With the one and only appearance design, the BLK has sucessfully draw people's attention. Other features like food grade glass mouthpiece and larger ceramic chamber even make it more attractive. One hit, you will love!

4 DIMENSION DISPLAYS AND ACCESSORIES

Accessories:

INDICATOR LIGHT DISPLAY

1. Battery Indicator

Press the power button 5 times to turn on the device. Battery power will be showed by different colors of indicator light. GREEN means high power, PURPLE means half power and RED means low power.

2. If low battery happens during power on or heating, the RED battery indicator light will flash 5 times then automatically power off.

3. Function

There are 5 temperature settings from top to bottom. 428°F(220°C), 410°F(210°C), 392°F(200°C), 374°F(190°C), 356°F(180°C). It will start heating in two seconds after power on. On the first use, the setting

temperature is 392°F(200°C). It will show RED during heating and turn GREEN when done.

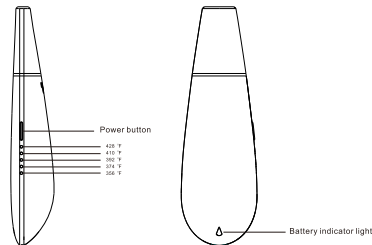

4. Temperature Shift

Press the power button 1.5s to shift. Hold the power button to shift from different levels and simply let go to choose the temperature you want. It will also memorise the last setting temperature.

5. Power Off

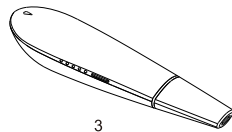

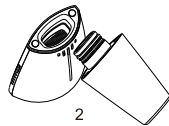

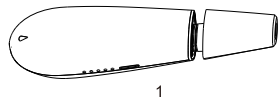

When in heating or standby mode, simply press the power button 5 times to turn off the device. Meanwhile, it will also be automatically powered off after 5 minutes to reserve the battery life.

6. When encountering malfunction, all the 5 temperature levels will flash RED/GREEN 5 times then automatically power off. You need to wait until its back to indoor temperature before try again. If it still does not work, then the device has been damaged.

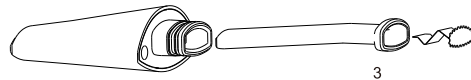

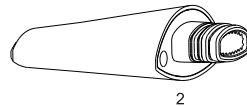

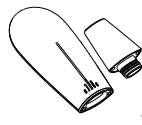

HOW TO USE?

1. Pull out the mouthpiece as the direction below
2. Filled with the materials
3. Put the mouthpiece back on the main body

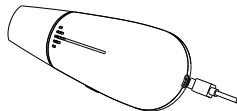

REFILL AND CLEANING
