

iDiskk USB Drive

For iPhone, iPad, iPod and Computers

Features

1. iDiskk products have been licenced by Apple.
2. With a Lightning connector on one end and a USB connector on the other, this makes it easy to sync photos, videos, music, and files between your iPhone, iPad, PCs and Mac computers without using cables, iCloud, or Internet connection.
3. Free app (available for download from the App Store) provides document viewer, copy and share files quickly, contacts backup-restore and more.
4. Pocket-size and amazing appearance making iDiskk your travelling companion.

App Installing

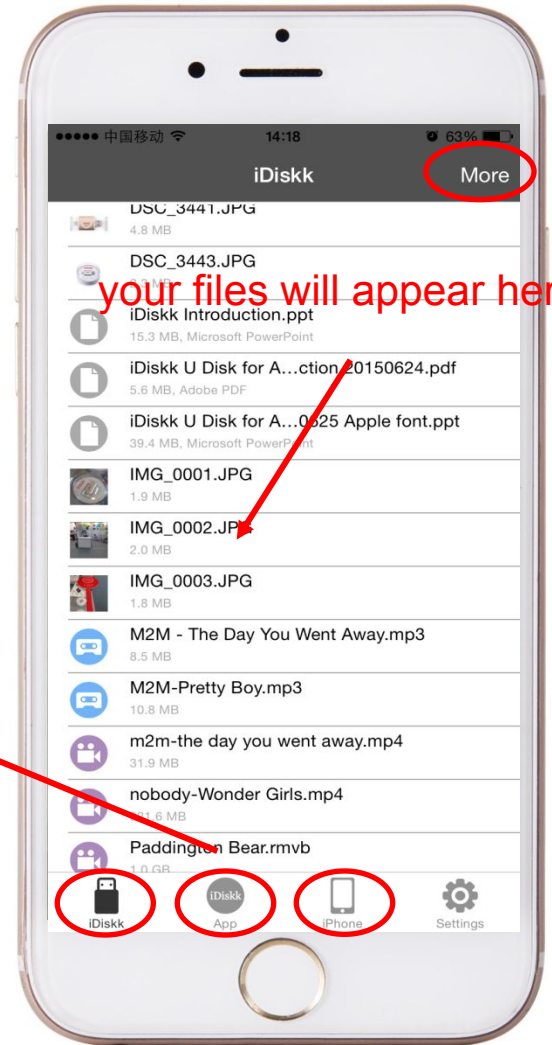

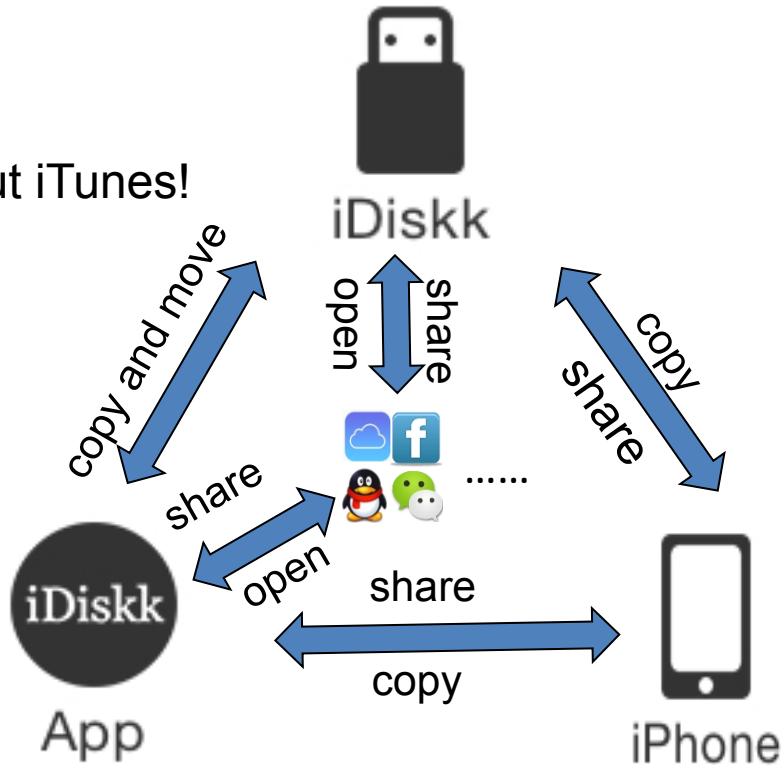

If you have not installed the iDiskk Pro, click and download the app on the first time connecting your device.

However, if the dialog box like shown above appears, that means the app will not be download automatically. You should go to AppStore and download it. This is a free app.

Okay, let's begin our iDiskk trip!

Without iTunes!

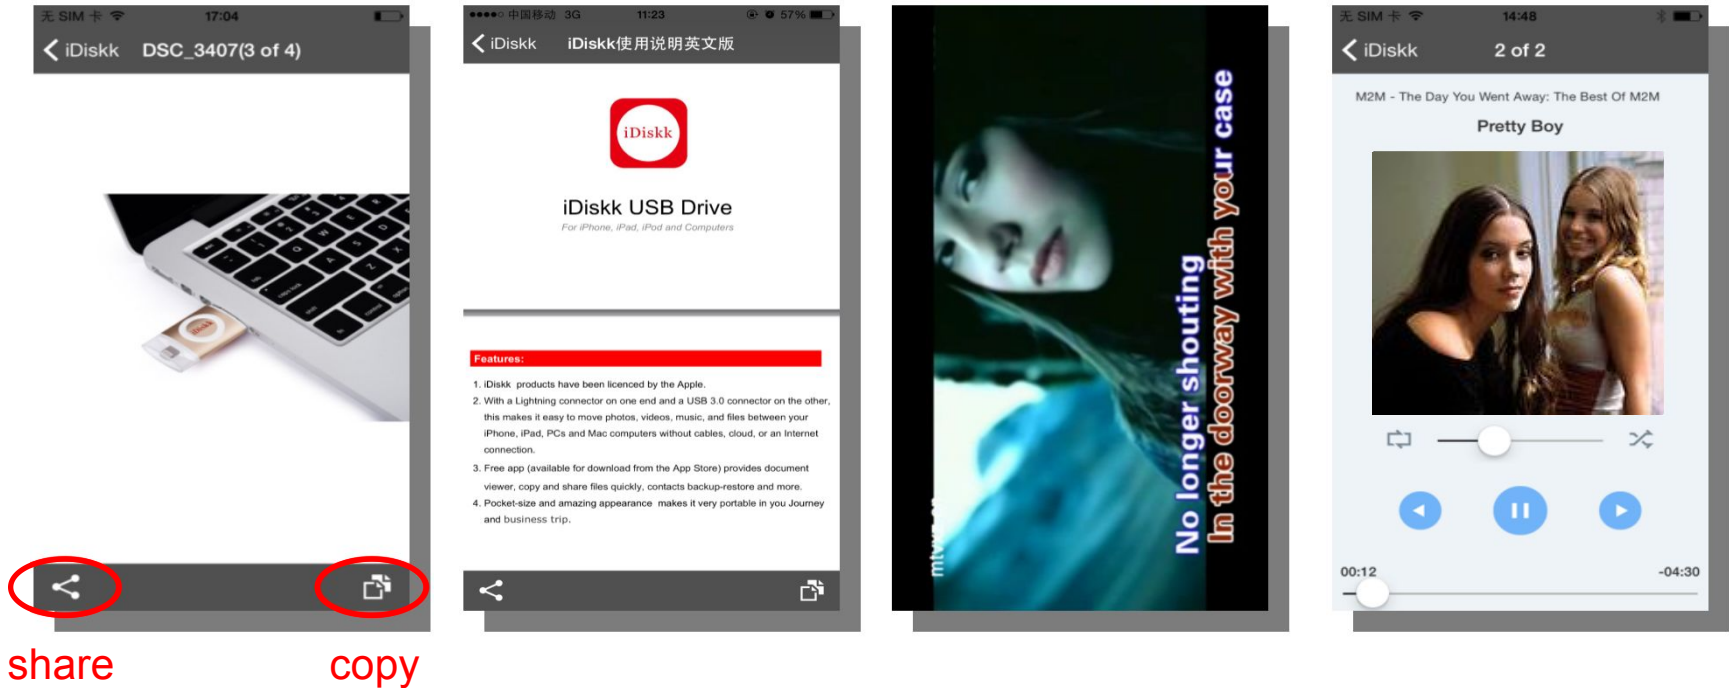

your files will appear here

All of your files stores in the drive will appear on the iDiskk app when connecting to phone.

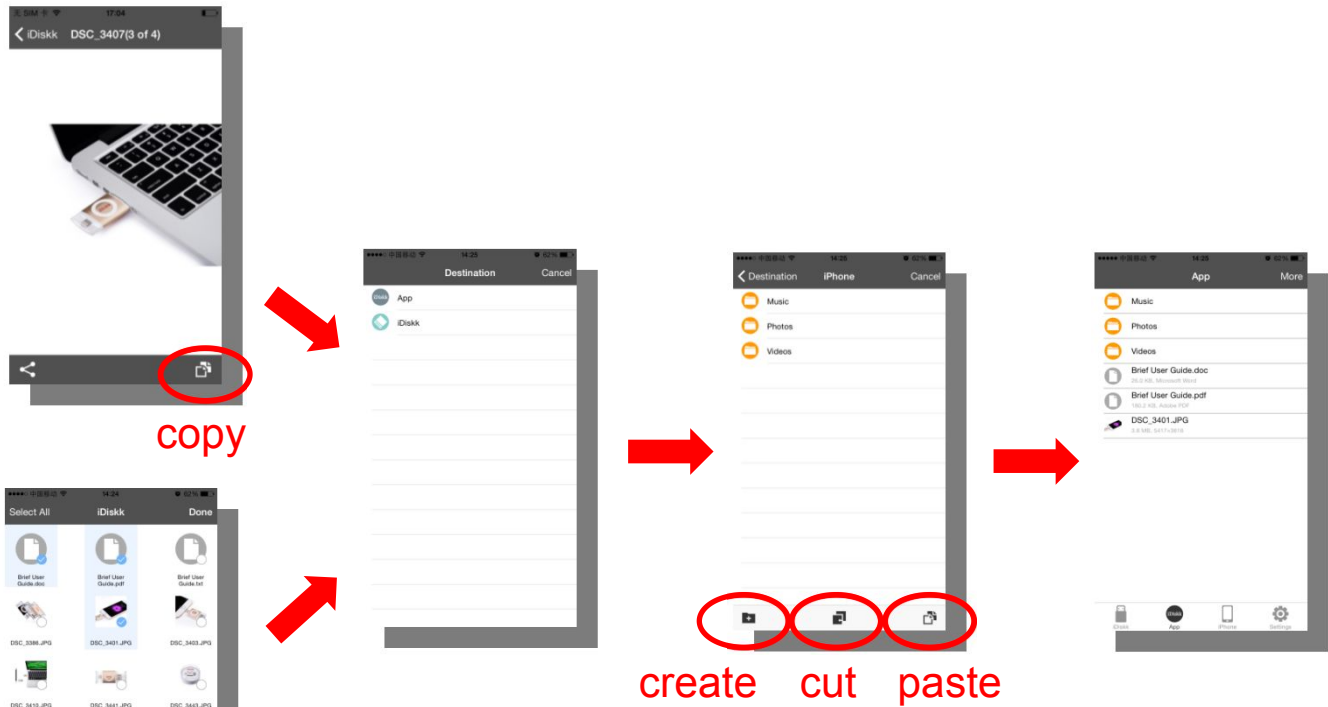

Play movies, music, scan photos and read documents directly from the drive with iDiskk Pro.

To share ,copy the photos and files please choose the button marked with red circle as show above.

- For example, there are 2 cases when you want to copy or cut files from iDiskk to app,
1. Copy when you open the app. However, not all types of files can be copied or cut this way.
 2. If you want to copy or cut more than one files at once, tap More → Edit → Select file(s) → Copy/ Cut → App → Find place to Paste → Paste.

Case one:

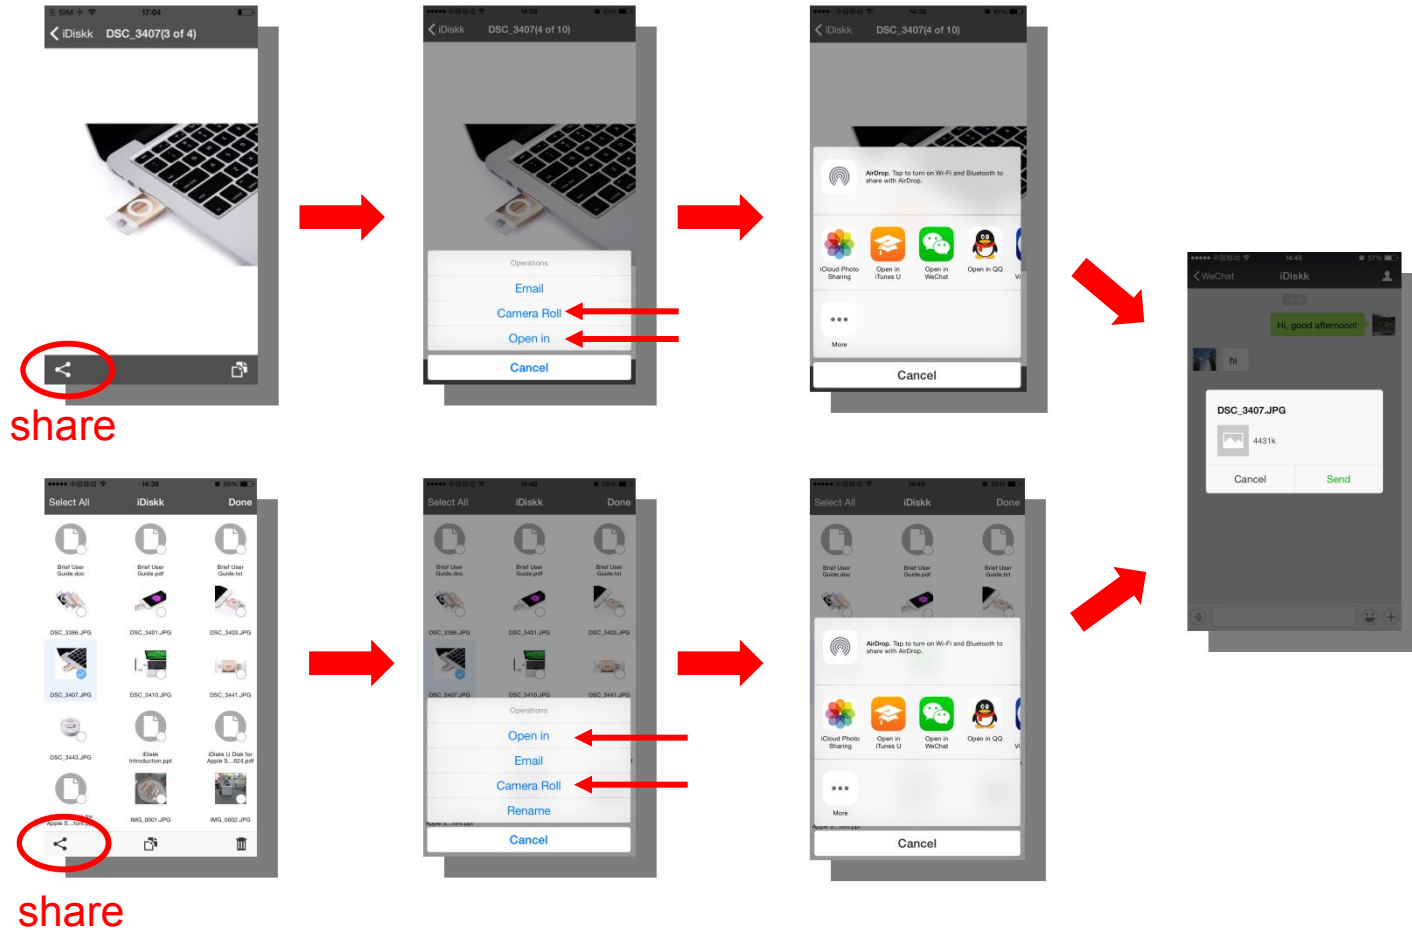

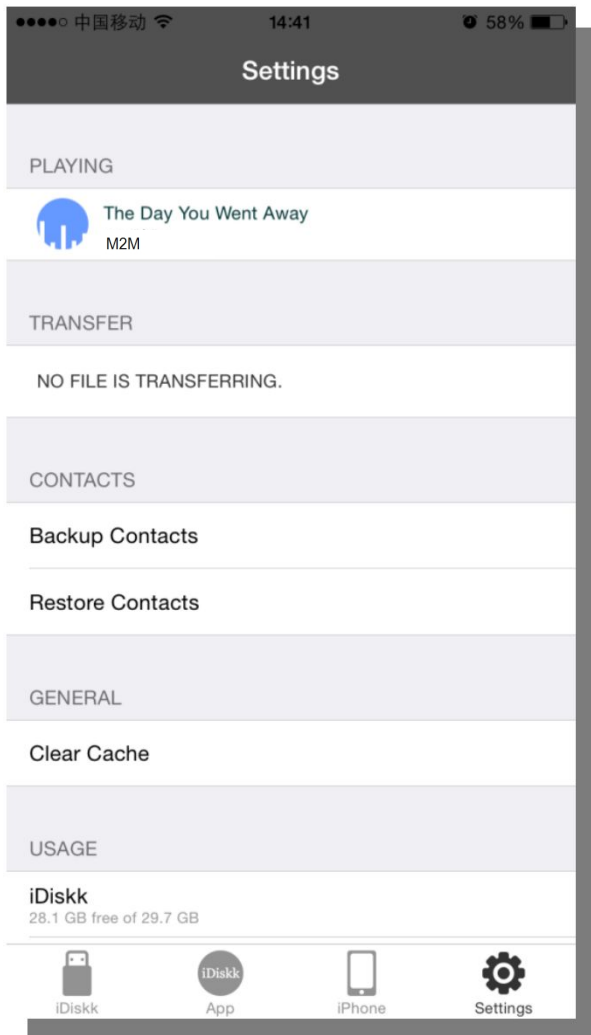

Case two:

If you want to share photos quickly with your friends, just need two steps:

1. Click the SHARE button and OPEN IN
2. Choose the app where you want to send. And your photos will be collected in your camera roll if you choose the CAMERA ROLL.

- It will go to mp3 screen when you tap on the music icon under the PLAYING if music is playing.
- Tap the under TRANSFER headline to see details about FILES.
- A backup file will be created and backup in the iDiskk and App as .vcr format when you click the column of Backup Contacts, and if you want to restore contacts, click Restore Contacts and select the backup files.
- To release the cache, click the Clear Cache under GENERAL.
- Tap the About iDiskk to go to to iDiskk official website.
- Now, enjoy yourself!
