

Thanks for choosing SW352 fitness tracker

1. There haven't a button can switch on the bracelet. So please try to charge it first before you use it. Please take out the electronic part from the strap, then charged it by any USB power supply, such as power bank, adapter or PC, no USB cable needed. It will be switched on automatically after charging.

If it can not be charged, please try to put the opposite of USB part into charging.

Warm tips: As the built-in battery capacity is small, it's not suggested to be charged for long time (do not more than 2 hours). Pls complete the charge after it's full of power, prolonged charging may shorten the battery's life.

USB Charge, No cable needed

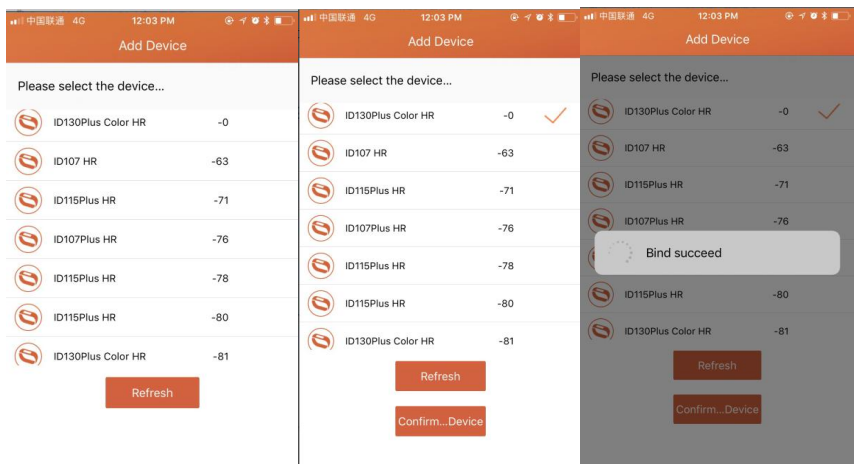

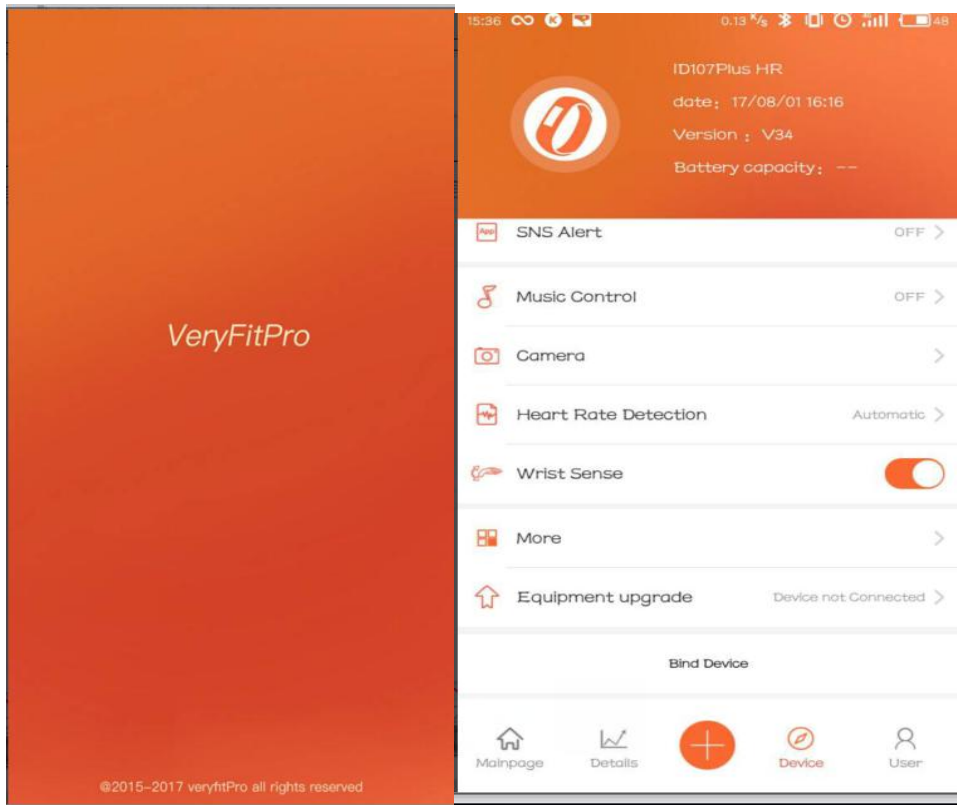

2. Bluetooth connection, please kindly refer to tips as below:

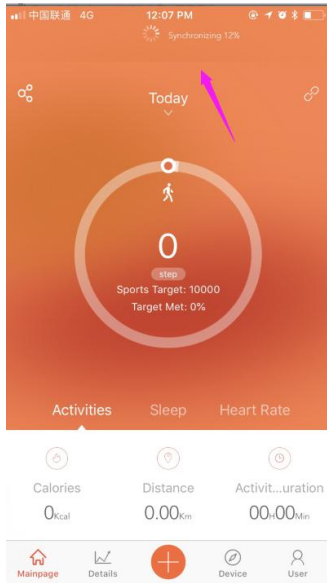

System requirement: Android 4.4 and above, iOS 7.1 and above. Bluetooth 4.0 and above. It does not work with Samsung J3, J5, A3, A5, HUAWEI P8, Windows devices, iPad.

Download and install the free app "VeryFitPro" by scanning the QR code or searching for it in the Google Play or Apple App Store. Trust the VeryfitPro app as a reliable app and safe application in your phone.

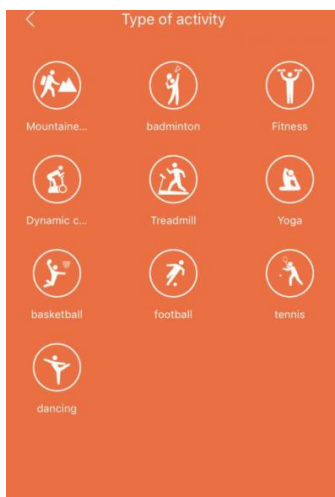

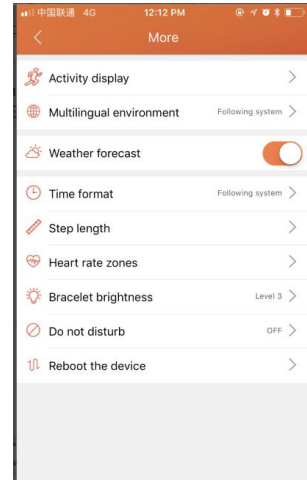

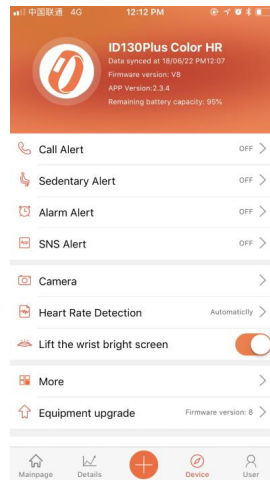

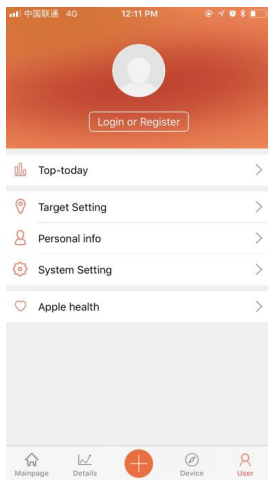

Go to "VeryfitPro" app -> Device->Bind Device, tap on "ID130Plus Color HR" confirm to bind the tracker.

3.If connected successful,All the data will be synchronized to the bracelet and there will be a slightly shaking on tracker. Like the picture:

4. Set Information on APP to get the accurate data, includes personal information, Target setting, System Setting, Notification function settings etc. After finish setting, please sync the data to the tracker.

5. Check data on APP (step, calorie, distance, sport time, sleep monitor, heart rate monitor...)
